PROFESSIONAL SUMMARY

Results-driven AI Automation Engineer and Data Analyst with experience in building predictive analytics solutions, intelligent automation systems, and data-driven applications. Skilled in Python, SQL, Machine Learning, Data Analysis, and workflow automation. Proven ability to transform raw data into actionable insights through Exploratory Data Analysis (EDA), feature engineering, and robust model evaluation. Passionate about leveraging AI and automation to solve real-world business problems at scale.

TECHNICAL SKILLS

Languages & Databases

Python, SQL (MySQL), C++, C

Machine Learning

Regression, Random Forest, XGBoost, Decision Trees, Classification Models, Anomaly Detection (Isolation Forest, LOF)

Data Science & Analytics

EDA, Feature Engineering, Statistical Analysis, Data Visualization, Model Evaluation, AUC-ROC, Confusion Matrix

Tools & Technologies

Git & GitHub, AWS, Supabase, Jupyter Notebook, VS Code

INDUSTRY EXPERIENCE

AI Automation Intern

Jun 2026 – Present

Physics Wallah (PW Headquarters) | Noida

- Developing AI-powered automation solutions and intelligent workflows.
- Building scalable automation pipelines to improve productivity and operational efficiency.
- Working with data-driven systems, analytics, and workflow optimization.
- Collaborating with product, engineering, and business teams on production-level applications.
- Contributing to the design and deployment of AI-enabled solutions for real-world use cases.

Web Development Intern

Apr 2025 – Jun 2025

Zidio Development | Remote

- Engineered scalable web application features, enhancing platform functionality and user experience.
- Collaborated with cross-functional engineering teams in an Agile environment.
- Participated in sprint planning, testing, deployment, and peer code reviews.

PROJECTS

JEE Mains Rank Predictor

Node.js, Supabase, Custom Domain Deployment | [Live Demo](#)

- Built and deployed a live JEE Mains Rank Predictor using historical exam trends and predictive analytics.
- Attracted 6,000+ organic users without any paid marketing, demonstrating strong product-market fit.
- Generated 50,000+ impressions through organic reach and user engagement.
- Developed the platform to support student counseling, admission intelligence, and lead generation initiatives.

- Designed scalable backend architecture and real-time prediction workflows using Node.js and Supabase.
- Successfully deployed on a custom domain with reliable production-grade availability and performance.

Credit Risk & Fraud Detection

Python, XGBoost, Random Forest | [GitHub Link](#)

- Designed a risk evaluation system using a 1,000+ record financial dataset.
- Achieved 78–81% model accuracy and an AUC-ROC score of 0.85.
- Implemented Isolation Forest and LOF algorithms for anomaly detection.
- Engineered 12+ custom features and validated performance through 5-fold cross-validation.

Student Mental Health & Overthinking Prediction

Python, Random Forest, Scikit-learn | [GitHub Link](#)

- Analyzed student behavioral and mental health datasets.
- Developed a machine learning model to classify overthinking levels.
- Built multiple visualizations to uncover key mental health patterns.
- Evaluated model performance using confusion matrix analysis and classification metrics.

EDUCATION

B.S. in Data Science & Applications – Indian Institute of Technology Madras

Expected 2028

B.Sc. in Mathematics – SNKP Government College

2022 – 2025

Higher Secondary Education (Class XII) – Eternal Life School

CERTIFICATIONS & ACHIEVEMENTS

- **Programming & Data Science Foundation:** IIT Madras
- **SQL and Relational Databases 101:** IBM Cognitive Class
- **AI Prompt Engineering Certification:** Chegg Skills
- **LeetCode:** 100+ Days Consistency Badge & 50 Days Consistency Badge.
- **CodeChef:** Problem Solver Badge (50+ Problems Solved).
